

### **EDB Platform Roadmap**

These CT

Sergio Romera, Senior Manager, Sales Engineer (EMEA South) 26<sup>th</sup> Sept 2024

# Sergio Romera

- Senior Manager, Sales Engineer @ EDB
- Based in France
- Database fanatic since 1997
- Developer, DBA, Architect, Sales Engineer
- Companies: BNPParibas, Quest Software, Oracle
- Postgres Certified Professional
- Kubernetes Cloud Native Associate certified
- Oracle Certified Associate
- AWS and Azure certified

Sergio Romera in

### Agenda

- Who is EDB
- PostgreSQL is winning
- Our architecture
- Roadmap

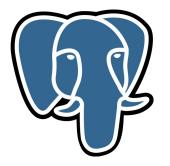

# Who is EDB?

©EDB 2024 – ALL RIGHTS RESERVED

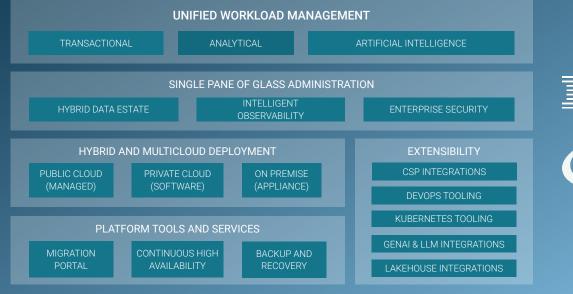

# An intelligent platform for unified management of transactional, analytical, and AI workloads - powered by Postgres.

### **EDB Portfolio**

### EDB POSTGRES AI PLATFORM

Delivered with world class strategic partners:

### Who is EDB?

### **1500+ Enterprises and Growing**

EDB deeply understands Enterprise Postgres needs.

### **79 Countries around the World** Global footprint and employee base.

# Millions of people using Postgres in the world

Long-term customers and deep Postgres capabilities.

# 3 of 7 Postgres Core Team Members, 7 Committers, 40+ Contributors EDB is the leading Postgres community contributor.

### 30% of Postgres Code Contributed in 2023

Driving the innovation and foundation of Postgres. >300 Dedicated Postgres engineers Unparalleled expertise in Postgres.

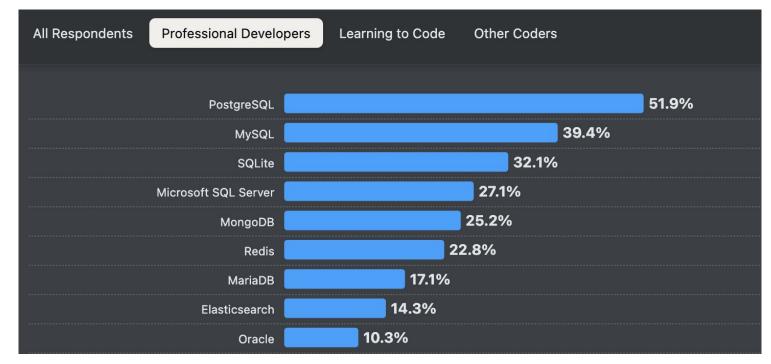

# PostgreSQL is Winning

### 30% of Postgres Code Contributed in 2023

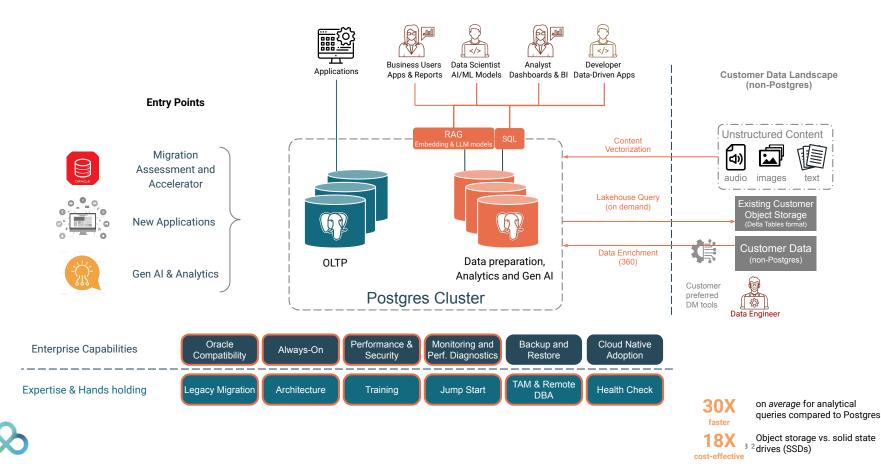

# **Our Architectures**

©EDB 2024 – ALL RIGHTS RESERVED

### **Architecture Overview - The Big Picture**

# Customers want the same: service level & expertise everywhere

### The same PostgreSQL - self-managed to fully-managed - on any cloud

- Same 24/7 expert PostgreSQL support
- Same break-fix, patching, maintenance
- Same HA and redundancy architectures
- Same security and upgrade policies
- Same backup and recovery
- Same to deployment mechanism & consistency to any Cloud/Hybrid and On-Premise

Private	Hybrid	Multi-cloud	Public
	000		0 0 0
Bare Metal	Virtual	Machines	Containers

### The same PostgreSQL - across every Postgres deployment in your entire estate

### **Deploy the Same PostgreSQL Everywhere**

Fully-managed service (SaaS)

AWS, Azure, GCP

Self-managed service (laaS or on-premises)

> AWS, Azure, GCP On-premises

0	
0	
0	

Kubernetes service (cloud-native or public cloud)

> Self-managed k8s Cloud vendor k8s

## What we will deliver in Q4 - Database Server

### **EDB Postgres v17**

#### Community Innovation and

**Leadership:** EDB Postgres Extended (PGE) Server and EDB Postgres Advanced Server (EPAS) version 17 incorporates all changes and enhancements from the PostgreSQL 17 release, including major capabilities from EDB staff.

#### Support customers with large

**tables:** Performance improvements compared to PostgreSQL for large partition counts in PGE and EPAS

### **Business Continuity (HA)**

EDB Postgres Distributed (PGD) Lightweight Architecture: Deploy

PGD with architectures that are similar to those you may already be familiar with such as Postgres Physical Streaming Replication or Oracle Data Guard Far Sync.

#### **Enhanced Read Only Group Performance:** Deploy larger read-only groups for servicing application queries while reducing the replication traffic through the PGD mesh

### **Secure Postgres**

**EDB as a Trusted Supply Chain for Postgres:** Software Bill of Materials (SBOM) reports for EDB Postgres Advanced Server and EDB Postgres Distributed (PGD).

#### **Compliance Ready Postgres:**

Deploy STIG and CIS compliant clusters with TPA, designed for adoption of Postgres in regulated industries

#### **Enterprise Security Tech**

**Partnerships:** Update Partners page and EDB Docs for new supported keystores: Fortanix DSM and Entrust KeyControl
